

BELLOWS FALLS NEWS

Fatality in Railroad Yard at North Walpole Wednesday

Victim Was Probably Dennis McGuy, a Weaver of West Swanzey, N. H.—Relatives Not Heard From.

An unknown man was killed in the Boston & Maine freight yard at North Walpole at 1:55 Wednesday morning. A special freight train on the Rutland railroad in charge of Conductor H. C. Edgerton, Dr. J. B. Keefe, H. B. Clarke and Engineer O. W. Sumner was switching in the Boston & Maine yard. The man was probably on the track and did not notice in the dark that the engine was backing up on the way to the Rutland yard.

When discovered the body was terribly mangled, the head being completely severed, the shoulders crushed, and the arms and body mutilated. The identity of the man was not known, but letters were found on one pocket addressed to Dennis McGuy, West Swanzey, N. H. No other marks of identification could be found.

The body was removed to the undertaking rooms of J. B. Keefe and lay there all day Wednesday. Later in the day the authorities learned that a man by the same name, a weaver by trade, was known in Providence, R. I. and had brothers there. Communication was opened with the chief of police there and efforts made to locate the relatives throughout the day.

Up to a late hour last evening no definite news had been heard from Providence and the authorities were in doubt to whom to deliver the body. The dead man was identified by three or four men from Saxtons River, as Dennis McGuy, a weaver from Oliveville, R. I. Up to last night no one had been able to claim the body although efforts were being made to locate his friends.

First Class License Granted Thomas Donegan

At the hearing by the board of license commissioners last Saturday on the application of Thomas Donegan for a first class license to be operated at 11 Bridge street, a protest against the granting of the license asked for was made in writing by the managers of the paper mills. Among the firms protesting were the International Paper company, Robertson Paper company, Moore & Thompson Paper company, Wyman Flint & Sons, John T. Moore & Son and John Robertson & Son. The location of the proposed saloon is within a stone's throw of the mills. The board decided to grant the license and in a very courteous communication addressed to the protestants make the statement "just as soon as any one of the business firms that sign the petition can prove to the board, and submit the same in writing, that the license to Mr. Donegan is a menace to their interests we will close the place at once." It is probable this is the only license that will be granted, at least for the present. This makes but four out of the six to which the town is entitled, as the drug stores have refused to accept unless three of them can have it. At the present time not a drop of liquor can be purchased legally for family or medicinal use. A man, or woman, may drink all they can hold at a bar, but none can be furnished elsewhere.

Case at Saxtons River Appealed to County Court

The case of R. A. Hussey, the Saxtons River barber, the account of whose arrest last week for violating Sunday laws for the state was given in the Phoenix, has proved a matter of much interest during the first three days of this week. Mr. Hussey was charged with keeping an open shop, shaving customers, and selling tobacco, fruit, etc., on Sunday contrary to the laws of the state. Mr. Hussey pleaded not guilty at his preliminary hearing May 14 and trial was set for Monday morning. He demanded a jury trial, which was granted by Justice C. H. Sanders. State's Attorney H. D. Ryder prosecuted and Chas. H. Williams defended Mr. Hussey. The trial lasted until 1:30 p. m. when the jury reported they could not agree and another one was drawn, but for various reasons the case was continued until Wednesday morning. The result of the second trial was that the jury returned the verdict of guilty and the maximum penalty of \$2 was imposed. The costs amounted to about \$50. Mr. Hussey has appealed the case to the county court.

The woman's club took in about \$100 at its rummage sale held in the Island skating rink last week.

Miss Kate Williams has returned from New York, where she spent the winter, and has opened her home on Westminster street.

The pre-memorial exercises of the public schools will be held at the various buildings Tuesday afternoon at 2 o'clock, in most instances taking place in the open air.

About 45 of the village firemen enjoyed a sumptuous banquet at Hotel Windham last Saturday evening. There were read and discussed by E. Keefe, J. H. Gately and W. H. Savage.

By vote of the senior class on Wednesday Rev. A. P. Pratt of the First Congregational church, will preach the biennial sermon June 25. The commencement address will be delivered by Charles H. Robb of Washington.

The rustic theatre at Barber park will be opened May 28 under the management of O. M. Custer, with the Empire vaudeville stars of Boston. Dances will be given in connection with the theatre, the first one on the opening night.

Mrs. H. E. Corbin of Charlestown, N. H. has just obtained pension of \$12 per month. Mrs. Corbin is the widow of J. W. Hackett, late of the United States signal corps, who died in line of duty in Alaska.

A mission, to continue a week, will open in St. Peter's church in North Walpole, Sunday, June 2. Services will be held each day during the following week. A mission will be held also here during the same period at St. Charles's church.

Miss Elizabeth Williams suffered a painful accident Tuesday morning while horse back riding. When she was on the village on the Westminster road her horse began kicking and she was thrown to the ground, striking on her head and shoulders. She was unconscious a short time. While her injuries are painful they are not considered serious.

The Socialist party of this state will hold a mass convention at Labor Union hall Saturday afternoon, June 2, at 3 o'clock, to name a state ticket. The arrangements for the convention are in charge of John Lynch of Bellows Falls and J. W. Shady of Putney.

The annual meeting of the Connecticut River Valley Medical Association was held at the Hotel Windham Tuesday. There was a large attendance of members, much larger than usual, and a number of papers of interest to the medical profession were read and discussed. Officers elected for the year were: President, Dr. J. Sutcliffe Hill of Bellows Falls; vice president, Dr. A. L. Dinmore of Keese; treasurer, Dr. E. Campbell of Bellows Falls; secretary, Dr. A. L. Miner of Bellows Falls.

Miss Mollie O'Neill, 17, daughter of Mr. and Mrs. Chas. J. O'Neill, died at her home in North Walpole Friday evening after an illness of over a year. The funeral was held Monday morning from St. Peter's church, Rev. Father Wilde officiating. Burial was in the Drewsville cemetery. She was always a favorite with her schoolmates and teachers, and was much beloved by them. Her gentle and patient disposition helped her to bear her long sickness.

SAXTONS RIVER.

May Morris is staying with Mrs. C. N. Smith. Wayne Rawson has been ill with bronchitis.

Maud Stoodley visited in Claremont a few days last week. Ethel Smith was in Hinsdale from Saturday to Monday night.

Patsy Harty is in several places in Massachusetts buying wool.

Mrs. Fred Ober of Athens visited Mrs. C. L. Gale last Saturday.

Mrs. Lulu Rawson is working at Mrs. Fred Morrison's at present.

Col. A. A. Hall of St. Albans visited his sister, Mrs. Fred Woods, last week.

Maud Stoodley went to Hinsdale Saturday to visit her sister, Mrs. Ray Woodward.

Guy Austin of Townshend has hired a tenement of Mrs. W. H. Campbell on Grove street.

Mrs. Hubbard visited her daughter, Mrs. H. L. Ballou, in Chester several days last week.

Mrs. Burnham of Gloucester, Mass., is staying with Miss Helen Nourse and visiting friends in town.

Mrs. Gould and daughter moved from the "beehive" recently to one of C. S. Frost's tenements on River street.

Mr. Conners and family have moved to the "beehive" in Gloucester, Mass., vacated by Mr. Harniss and family.

Mrs. Will Stoodley returned from Hinsdale Monday, accompanied by her son, Curtis. He returned to Hinsdale Wednesday.

Madam Waiter and Mrs. S. T. Andrews dined at the Kurn Hatlin home in Westminster last Sunday with the 23 boys in that home.

Mrs. Ella Bemis, who has been in Weston, caring for her niece, Miss Della Pratt, returned to W. A. Marvin's last Wednesday.

Guides boards have been put up in the village this week. The electric street car sidewalks has been prohibited this week by posting notices.

Mr. Tallerton and family of Alstead have moved to the tenement of Len Tallerton. He will work for W. W. Cory in the blacksmith shop.

Several from this place attended the recital in Bellows Falls Friday evening, given by the Y. W. C. A. at the town hall. Several of her pupils in this town took part.

Miss Della Pratt, formerly of this place, died of consumption last Saturday at Weston, Mass. Her husband, Mr. Pratt, her brother, Mortimer, is very ill with the same disease and rheumatism.

WESTMINSTER.

Henry Wood lost a valuable horse recently. Miss Whitney visited her uncle, B. F. Sleeper, over Sunday.

Mrs. Lizzie Pierce, who has been ill since November, is still suffering with neuralgia.

Mr. Edwin G. Libbey was with her sister, Mrs. Fred Amidon, from Saturday until Tuesday, and assisted in straightening up her household.

Mr. and Mrs. G. H. Walker and Mrs. Minnie Tyler of South Londonderry started Saturday on an automobile trip to Boston and vicinity.

Rev. Mr. Whitcomb and Walter Farr were delegates from the church here to the installation of Rev. Mr. Pratt of the Congregational church in Bellows Falls yesterday.

The regular meeting of Boyden Grange was held last Friday evening. After the business meeting a short literary program was carried on until 10 o'clock.

The body of Clark P. Whitney, formerly of this place, was brought to town from Windham and buried at 5 p. m. beside his wife and eldest daughter, Emma. He died at the home of his daughter, Mrs. Lettie Gould in Windham. Rev. Mr. Whitcomb offered prayer at the grave. He leaves three daughters besides Mrs. Gould, Mrs. Ella Atwood of this place, Mrs. Ida Joslin of Hartford, Conn., and Mrs. Mattie Wetherbe of Bellows Falls.

Saxtons River Valley Pomona Grange met with Boyden Grange Tuesday afternoon at an evening session. The next meeting evening meeting was in charge of Mrs. Clark, lecturer of the Pomona. The program was as follows: Song of welcome; prayer; reading of the minutes; report of the Pomona; reading by Mrs. Annie C. Wright, lecturer of Saxtons River Grange; singing; prayer; reading by Mrs. Annie Thomas, lecturer of Boyden Grange; singing by the audience.

GUILFORD CENTRE.

The road commissioner is busy this week on the roads in district No. 2.

Miss Rose Howe of Putney is working for Mrs. Dana Howard.

Mr. and Mrs. Darling Franklin gave a dance Tuesday evening, which was well attended and much enjoyed.

Mr. and Mrs. Charles Franklin and three children came to W. H. Jacobs' Wednesday for a visit.

Mrs. William J. Browne of New York, sister of Mrs. Charles F. Ramsdell, with her son, Everett, is visiting at Rose Hill this week.

The services elsewhere announced for Sunday afternoon at the Universalist church will be omitted owing to the funeral of George J. Reed of Green River, who died last night.

Dowle Declared Bankrupt.

The attorneys in the Dowle litigation have agreed to allow Judge Landis of the United States district court to settle all the points in controversy between Dowle and the creditors. The only true way to that effect will be presented to the court tomorrow.

A formal order declaring that Dowle is an individual bankrupt has been entered.

RHEUMATISM CANNOT BE CURED UNLESS URIC-ACID IS USED.

The Store of C. E. Graffam is the Home for Uric-Acid in Brattleboro.

The Rheumatic patient is skeptical regarding the claims of almost any remedy advertised as a cure for Rheumatism and one can scarcely blame him for being so. All the plasters and liniments combine to never actually cured a case of Rheumatism. They may relieve it in one quarter, but it is sure to break out somewhere else. The only true way to cure Rheumatism is to drive it from the system, for as long as the Uric Acid remains in the system, it will drive it to some other part of the body.

The chief reason that Uric-Acid is such a wonderful cure for Rheumatism is that it is designed and prepared to cure Rheumatism and Rheumatism only. It does not contain any alcohol or other so-called tonics to make one "feel good" for the time being, but is composed of antiseptics for the Uric Acid and drives it from the system. That is why Uric-Acid is such an admirable and effective cure for Rheumatism.

Uric-Acid is sold by C. E. Graffam, the Home for Uric-Acid, in Brattleboro, at 75 cents and \$1.00 the bottle, but if you feel skeptical about its efficacy you can test it free of charge by cutting out this advertisement and sending same to the Store of C. E. Graffam, 100 N. Y. and they will send you a sample bottle free. To persons who write and say they have never used Uric-Acid, want to test it thoroughly, and will agree to make it systematically, I will send you a bottle, they frequently send a regular 75 cent bottle free.

BIDS ON WATER WORKS

Village Water Committee Will Receive Them at 4 P. M. Today

Representatives of a Dozen Contracting Firms Here—Provision for Issuance of Water Bonds.

The village water board has been busy this week showing contractors over the course of the proposed independent village water system and attending to the various details incident to securing bids for putting in the system. Headquarters were established Monday in the office of James F. Hooker, chairman of the water board, where blue-print profiles were displayed on the walls and where copies of the specifications were examined by the contractors.

About a dozen contractors came to Brattleboro Monday and enough more came Tuesday to bring the total number up to about 16. Some have gone home while others have remained to learn the amounts of the bids, which will be opened at 4 o'clock today. Engineer A. H. Towne of Springfield, Mass., and members of the board accompanied the contractors over the territory which the proposed system involves and gave them all the assistance they could.

The contractors came from Boston, New York, Springfield, Worcester, Hartford and other cities.

The Specifications.

Grubbing and clearing reservoir, 14 acres.

Grubbing and clearing intake, 5 acres.

Furnishing and delivering and laying the following: 16-inch pipe, 24,000 lineal feet; 12-inch pipe, 12,000 lineal feet; 8-inch pipe, 2 miles 300 feet head; remainder 400 feet head.

Twelve-inch pipe, 2825 lineal feet, 113 net tons.

Ten-inch pipe, 6724 lineal feet, 237 net tons, 400 feet head.

Eight-inch pipe, 15,112 lineal feet, 330 net tons, 200 feet head.

Six-inch pipe, 10,820 lineal feet, 150 net tons.

Furnish and deliver to yard the following: Eight-inch pipe, 643 lineal feet, 16 2-10 net tons, 400 feet head; six-inch pipe, 20,759 lineal feet, 364 2-10 net tons.

Furnish, deliver and lay: 16-inch gates, 5; 12-inch gates, 2; 10-inch gates, 6; 8-inch gates, 2; 6-inch gates, 14.

About 20 tons of sots.

Hydrants, two way, 6-inch connection, 5-inch gate opening, 66.

Lead, 88,300 pounds with reference to the general and particular requirements contained in any right of way, leases, grants or purchases acquired by the water board and that he will carry out such requirements in every particular to the entire satisfaction of the water board, so as to save the water board from any expense or trouble arising from any of the said requirements.

The location of the work to be done under the terms and agreements of these specifications is as follows: A dam and reservoir with a capacity of about 22,000,000 gallons will be built on Halliday brook, about five miles west of Brattleboro village; an intake reservoir of 2,000,000 gallons will be built on said brook about 1200 feet east of said reservoir, a 16-inch surface main will be laid easterly from said intake reservoir along a private right of way or traveled highway for about 24,000 feet, or to the corner of High and Green streets in said village. Hydrants will be placed at points to be determined by the water board. The distributing system will cover the following streets: the size and approximate length on each being as shown on file at the office of James F. Hooker.

The work to be done shall include the price of grubbing, clearing of reservoir and intake, site of construction of reservoir, dam, dam and gate houses, with necessary exhaust and supply pipe, the furnishings of all material, labor and tools for the entire work, and in fact, furnishing of material, pipes, gates, hydrants, blow off and special work. The entire system to be complete and ready for operation, first class work, and the contractor to be bound to the water board and the engineer.

The work shall be done in strict conformity with such lines, levels, stakes, bench marks, maps, drawings, specifications and directions as shall from time to time be given by the engineer for the guidance and direction of the contractor.

There are two forms of bids: (A) For all material and labor required in constructing both storage and intake reservoirs, including grubbing and clearing of site, furnishing of material and constructing both core wall dams, gate houses, gates, screens, and in fact, completing all work required to bring the water to the intake reservoir at stream face of intake reservoir.

(B) For furnishing, delivering and placing entire system of supply and distributing mains, pipes, hydrants, supplies, and in fact, furnishing of material and constructing and building the entire system with the exception of the items under (A) above, according to the plans and specifications.

The contractor is called upon to fill out a list of itemized prices for the different items of work.

Arrangements are made for monthly payment for work, with a percentage to be withheld by the water board.

It is agreed that the contractor is to receive and accept in payment and as full compensation for all of the material furnished and for constructing all of the work to the amount of \$125,000 and to accept as a balance of payment a note or notes on the village of Brattleboro.

Provisions are made for extra work, for the assumption of all liability for damages by the contractor, etc., and the decision of the engineer with reference to the agreement and specifications is to be final.

The specifications cover in great detail the manner in which the work shall be done.

BIDS DO NOT COVER ALL.

Some Streets Not Included in the Call—Halliday Road Can Be Discontinued Only by Court Order.

An examination of the specifications which the water board submitted to the contractor shows that a great deal of money will have to be paid out by the village beyond what is set under this contract. In the first place, the contractor's contract does not cover or include the water damages; this was estimated by the engineers for the village, last summer, in case the present plan of the water board should be carried out, at about \$44,000; nor do these specifications cover the expense of protecting the system, the reservoir and the watershed from pollution.

Good Clothes

The thing upon which we chiefly pride ourselves is our ability to give you the best Men's Clothing manufactured, and ask you the lowest prices for it. Upon that rests our claim for your patronage.

Never were better styles shown anywhere, nor better qualities. Supreme satisfaction awaits the man who selects his summer suit from this splendid stock.

Suits as low as \$5 Suits as high as \$22 Special Values in Suits at \$10, \$12, \$15

Blue Serge Suits We call special attention to our line of Blue Serge Suits at \$8, \$10, \$12, \$15.

That Little Pain in Your Back threatens your Kidneys. If allowed to go on a little while you will suffer throughout the entire system, like water, the proposed village system will have to be practically doubled, which the Crowell system does, will require a very large outlay above the amount called for by the proposed contract.

It is estimated by one of the contractors who was here that the proposed village system with the distributing system called for will cost to complete it, including all water and land damage, and distributing system covering the territory that the Crowell system covers, practically double the amount which is simply the work and furnish the material required by the proposed contract. So, whatever bid is received by the water board, if the contract should be let, the amount will have to be practically doubled to show what the system would cost the village; then, the village will have simply Halliday brook, nothing more, with a reservoir of 22,000,000 gallons. The requirements which the water board put upon Mr. Crowell in the proposition they made him was to have storage for 300,000,000 gallons of water, and the proposed village system has 22,000,000 gallons, with a water shed only a fraction the size of the Crowell system. The village cannot know from any bids that are received on the proposed plan what an effective water system will cost.

Another complication seems to be in the way for the contract for the Halliday brook for a water supply for Brattleboro, as proposed by the water board.

The proposed reservoir will require the discontinuance of the Halliday road for some distance and the building of a new road in another place.

It appears that the Halliday road is a county road laid out by the county court in 1866, and cannot by law be discontinued, except by order of the county court. This seems to have been overlooked until now.

Chairman Hooker, of the water board, and the committee, state in substance that they realize that the bids called for will not cover the cost of laying pipe on all the streets which it is planned to supply with water. They say they will cover all the work that can be done this year, which will embrace the greater part of the area which the village will cover. They expect that the bids they receive at present called for and whatever expense is incurred subsequently will come well within the village appropriation of \$250,000.
